

Project Engineer II

Laclede Gas Company seeks a Project Engineer II in its Project Engineering Department. This position is responsible for providing engineering expertise across multiple disciplines in researching, analyzing, and quantifying the feasibility of numerous small and large-scale projects and continuous improvement efforts in the areas of business processes and practices. As Project Engineer II, you will complete capital estimates for a variety of projects for the cyclical business planning effort. In addition, you will complete engineering specifications and designs for new pipe installations, regulator stations, code compliance, improvements, construction/gas conditioning equipment and instrumentation, and retirements of pipeline systems for natural gas and propane pipelines within the Laclede Gas and Laclede Pipeline systems.

Qualified applicants should have a Bachelor's degree in Engineering, and one to three years' experience in continuous process improvement techniques, natural gas and propane pipeline construction or commensurate experience, and project management experience. Proficiency in MS Office, MS Project, and AutoCAD required.

Laclede offers a competitive salary and excellent benefits package, including health insurance, 401k, pension plan, and tuition reimbursement. Apply on-line at:
