

Senior Project Engineer

An ISO:9001:2008 certified rapidly growing hi-tech business is seeking a highly motivated and capable Senior Project Engineer. The position is located in the St. Louis Metro area. Responsibilities will include engineering, project management, and customer relations. Excellent communication skills are required. Innovative thinking and a natural curiosity combined with problem solving is a must. Essential functions include: (a) manufacturing process development and process improvement, (b) manage a production process or product from conception through production, and (c) hands on skills requiring the use of hand and power tools to fabricate and build items, and (d) working with and around equipment and in a factory environment. Qualifications required are: (a) Bachelor of Science degree in Mechanical/Welding/Electrical Engineering or equivalent, and (b) minimum of five years engineering experience in product, manufacturing, and process design and improvement. Please send your resume via email to amarcus@missourienterprise.org. Put in the Subject "Senior Project Engineer Position".
