

Maintenance Engineer II

Laclede Gas Company seeks a Maintenance Engineer II in its Maintenance Engineering Department. This position is responsible for providing engineering support of various main and service line replacement programs and the development and management of maintenance programs to comply with State and Federal pipeline safety programs.

This position requires a Bachelor's degree in Engineering and two years of project experience. The right individual will have extensive computer skills (at least three years), specifically in MS Access, ArcView and ERSI software applications. General knowledge of Missouri Public Service Commission Pipeline Safety Regulations preferred. This position requires the ability to support multiple projects, and demonstrate excellent written and interpersonal communication skills.

Laclede offers a competitive compensation package. Benefits include 401k, pension plan, health insurance, and tuition reimbursement. Apply on-line at: www.lacledegas.com
