

PEG has an immediate opening for a Sr. Instrument & Control Engineer for one of our clients in the St. Louis area. This is a permanent full time role and we are currently accepting resumes.

Responsibilities:

- Produce engineering documentation (P&IDs, Valve List, Instrument List, Logic Diagrams, Air/Electrical Load Lists, etc..)
- Respond to client requests for information during duration of the projects.
- Inform PM of cost and schedule impact resulting from customer requests or customer comments to documentation.
- Provide guidance and support to I&C procurement engineer in order to maintain project schedule and correct technical specification of equipment.

Qualifications:

- BS in Engineering preferably Mechanical
- 5-8 years of relevant experience
- Ability to create P&IDs using standard ISA symbols.
- Proficient in Microsoft Office

If you are interested in this opening, please contact Dan Lauck at [dlauck@pegstaff.com](mailto:dlauck@pegstaff.com)
