

PEG currently has an immediate need for a Welding Engineer for a client in the St. Louis area. This is a permanent full time position.

Responsibilities:

- Develop and oversee welding requirements for various projects, including weld, post weld heat treatment and fabrication in support of the customer requirements.
- Support the implementation and execution of the company's Quality Program.
- Verify compliance to the project welding requirements through the review of procedures.
- Solve various welding and heat treatment issues.
- Provide consultation on the fabrication of metals.

Qualifications:

- BS in Engineering preferably in Mechanical or Metallurgy
- 3-5 years of relevant experience
- Team player, good presentation skills are required.
