- *Megan Ottomeyer, \$2,500, U. of MO- Science and Technology*
- *Sarah Smith, \$2,500, U. of MO- Columbia*
- *Claire Segar, \$2,500, Washington University*

**The Engineers' Club of St. Louis**, organized on December 2, 1868, is the third oldest engineering society in America. In addition to Professional Engineers, its membership includes architects, executives and business administrators, as well as men and women in the technical, scientific, educational, marketing and legal fields.

The Engineers' Club facility on **4359 Lindell Blvd** is home to over 950 club members and, through the services of the Engineering Center, to over 50 affiliated Professional Societies, representing over 14,000 members.

It is the mission of the Engineers' Club to promote the educational, social and professional advancement of its members; to assist community leaders, civic organizations and public agencies by providing advice on and giving support to issues which benefit the St. Louis community and to serve as a focal point of engineering activities in the St. Louis area by acting as liaison between the Club's many affiliated societies and maintaining physical facilities which can be used by the engineering community for educational, social and business activities.
